Subject: Application for Machine Learning Engineer / Data Analyst Position

Dear Hiring Manager,

I am writing to express my interest in the Machine Learning Engineer position at your organization.

Currently, I work as an Assistant System Engineer at Tata Consultancy Services (TCS), supporting a banking domain project for State Bank of India (SBI). Over the past year, I have gained experience in analyzing large-scale transaction datasets and system logs, performing root cause analysis, applying exploratory data analysis techniques, and generating actionable insights using SQL and Excel. This experience has strengthened my analytical thinking and problem-solving abilities in a production environment.

In addition to my professional experience, I have worked on Machine Learning projects including Credit Risk Assessment using Decision Trees and Time Series Forecasting using AR, ARIMA, and SARIMA models. Through these projects, I have gained hands-on experience in data preprocessing, model building, evaluation, and forecasting.

My technical skills include Python, SQL, Scikit-learn, Machine Learning, and Time Series Analysis. I am eager to apply these skills while continuing to grow in Machine Learning, Deep Learning, and MLOps.

I would welcome the opportunity to discuss how my experience and skills can contribute to your team. Thank you for your time and consideration.

Sincerely,

Om Raskar
